
Note: The 15 highest firm-topic relevance scores among S&P 500 firms with at least three 10-K filings, 1992–2026. A firm's score on a topic is the mean, across its filings, of the top-5 sentence-to-topic-centroid cosine, standardized within topic and filing-length decile (z-score; 0 = typical filing). Topics are the frozen Stage-3 codebook v1.0; firm sentences are 10-K Item 1 (Business).
